GSASC Member Alert

In 2008, GSASC informed members of a new requirement under the CON Reform Act of 2008 that would require a mandatory annual survey for existing ambulatory surgery centers operating with Letters of Non-reviewability. The first annual survey was due to be submitted in January 2009.

The Georgia Department of Community Health has just announced that the survey is not ready and will therefore not be due in January.

DCH's intention is to issue the Ambulatory Surgery Services Survey on or before March 31, 2009.

GSASC will send members more information as we receive it from DCH.
